

PVE 7 NL HAMMER

Mass: 10849 kg

all dimensions are in millimeters

Technical specifications

- Cylinder assembly in a way that minimizes wear and tear on bearings
- High quality and easy to exchange drive cap assembly
- Shock-resistant electronic connectors & high quality electronic cable
- Accelerated mode to optimize efficiency
- Modular design which makes parts interchangeable
- Solid construction of leader guidance assembly
- High consistent blow rate at max. stroke

Max. potential energy	74,493 ft-lb
Max. net. energy	61,955 ft-lb
Maximum stroke	47 inch
Minimum stroke	4 inch
Blowrate at max. stroke	40 bl/min
Ram weight	15,432 lbs
Ham. weight incl. drive cap	23,809 lbs
Maximum pressure	2,683 psi
Required oilflow	103 gpm
Length indication	21.32 ft-inch
Max. width indication	3.08 ft
Max. height indication	3.08 ft
